

Steve's Gardening Service

Professional Landscape Contractors

"Steve's Gardening Service has done a fantastic job on my yard. Not only did they install the yard in a professionally responsible manner, they have also continued to maintain and supervise its ongoing development. Steve has called in specialized contractors to trim the trees when necessary, and all the work they have done has taken into consideration the concerns of the neighbors."

Russell Lau, vice chair and CEO Finance Factors Ltd.

"I have worked with Steve's Gardening Service on various projects for the past six years and found them very reliable and the quality of their work is exceptional. Their crews are professional and their response to problems is immediate. They have done a bang up job a number of our projects, especially the Ihona townhouse development that we manage in Waipio."

Steve Dewald, owner of Steve's Gardening Service, is a fourth generation landscaper and has learned that business success comes from delivering the best quality in workmanship and plant materials backed by exceptional service all at a reasonable cost.

Steve's Gardening Service specializes in creating lush tropical gardens complete with moss rock and water features as well as more traditional European type landscapes. Beauty and simplicity are hallmarks of the company's work. "I believe in giving the customer the most buying power for their dollar without sacrificing the quality of workmanship," says Dewald.

Offering both residential and commercial services, the firm works on one installation at a time insuring the highest quality possible.

Many homeowners make the mistake of working without a master plan. Steve's Gardening Service will consult with homeowners and builders to develop an overall master plan that takes into account irrigation, drainage, grading and the maturing of your landscape. When necessary, professional landscape architects are consulted to insure that the homeowner or developer will be pleased with the finished product.

To make an overall landscape project more affordable, work can be done in stages as budgets permit utilizing the master plan to sequence work to save both time and money while achieving

"We very pleased with the product Steve's Gardening Service delivers. Their reliability and attention to detail is exceptional. Our clients are pleased with the company's performance."

Stephan Mechler, American Society of Landscape Architects
- The Mechler Corporation

the goal of a beautiful new landscape. "When planning a landscape, a homeowner should take their time. If finances are not available for the entire project at once, work can be done in phases. Certain elements must go in the correct sequence to prevent serious problems in the future. Our goal is to save the client time and money while still delivering the landscape of their dreams," says Dewald.

In addition to landscaping, Steve's Gardening Service introduced the concept of optional hardscape features to Hawaii's marketplace. Basic landscape plans can be expanded to include features such as koi ponds, waterfalls, brick and paved borders and even stamped concrete, flagstone or quartzite patios.

The emphasis is on low maintenance landscapes that look lush and beautiful. "The fact is in today's age, most households are two income families which doesn't leave much time for tending to high maintenance landscapes," says Dewald. By working closely with homeowners and developers Steve's Gardening Service delivers high quality, beauty and affordability. This formula for success has brought Steve's Gardening Service repeat customers from multi-million dollar mansions to modest subdivision homes.

"Steve's staff did a great job; they were on time and very professional. The plants and trees were top quality. Steve supervised every aspect of the project, which was very comforting. My grounds were transformed into a park-like setting with top quality plants, trees and lighting. I am very pleased with the result."
